What is EVV?

- The 21st Century Cures Act, signed into law December 13th, 2016, by President Obama, requires state agencies to use a system of **electronic visit verification** (EVV) for all Medicaid personal care services (PCS) and home health care services (HHCS) that require an in-home visit by a provider.
- EVV uses electronic devices to verify a provider's visit
- The following data is collected for each visit:
 - ✓ The date of the service
 - ✓ The location of the service delivery
 - ✓ The time the service begins and ends
 - ✓ The individual receiving the service
 - ✓ The individual providing the service
 - ✓ The type of service performed

Why DCI & EVV (Electronic Visit Verification)?

- DCI increases compliance with the 21st Century Cures Act by capturing real-time punch entries at Clock In/Out at the Start/End of the shift
- Greater accuracy in service tracking, reporting, and billing for in-home care workers.
- Reduction of manual work needed with paper processes
- Faster corrections of pay issues ensuring timely payment

How does facial recognition work?

Facial recognition is the process of identifying or verifying a person's identity by comparing their face to a collection of pictures of them. It "learns" over time and becomes more accurate with each submission. Acumen will collect, but not share photos. Photos are stored in a secure business cloud and are only used by our facial recognition technology to verify that the client was present for the employee's visit.

Alerts

Business rules are a tool used by your organization to validate, by service code, specific requirements mandated by that service. When a punch violates a business rule, the employee will receive an alert explaining the violation and what action needs to be taken.

One of the most common business rules is the **Authorization Remaining Balance** rule. This rule checks to see that there are enough funds in the authorization/service plan to cover the punch.

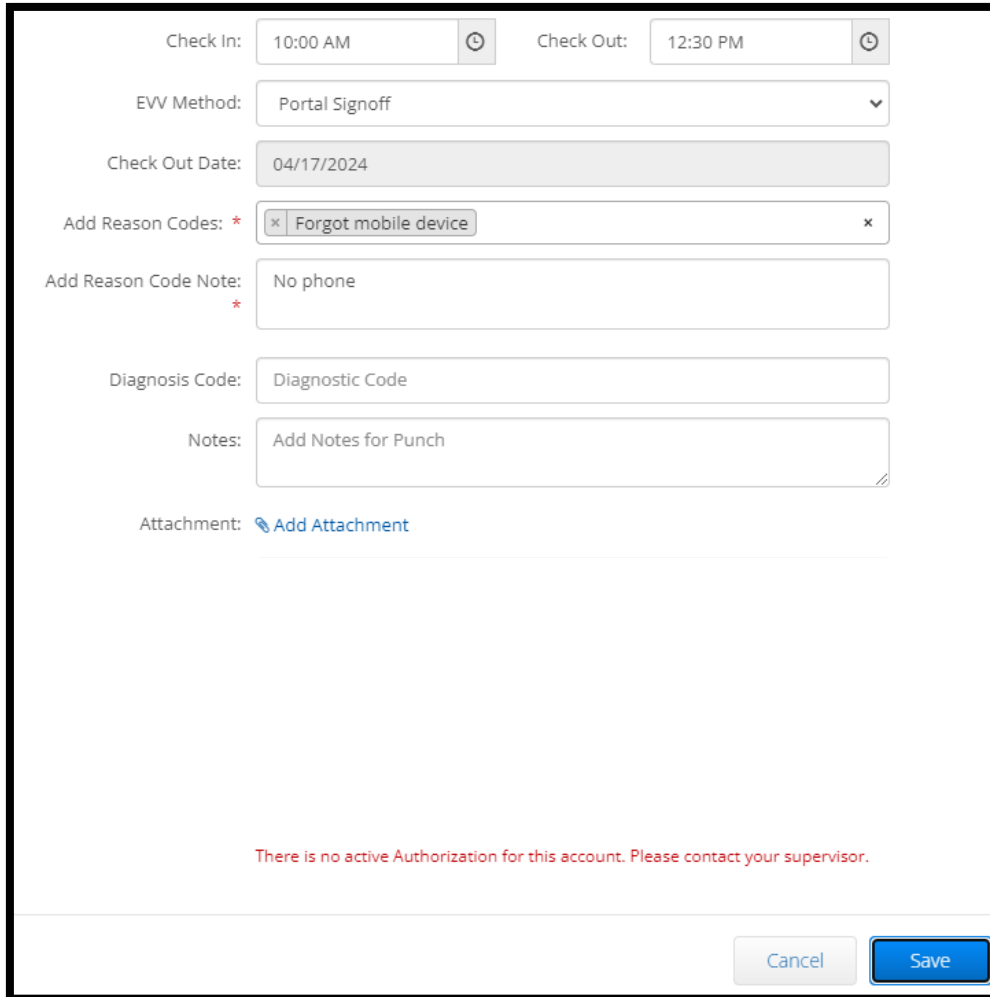

Business Rule Name
Authorization Remaining Balance

- The employee will receive this alert and cannot save the punch
- They must edit the punch or cancel the entry
- The employer should review their unit utilization

Alerts

Many other business rules pertain to the authorization/service plan such as the **Authorization Expiration Date** rule.

The screenshot displays a web-based punch clock interface. At the top, there are fields for 'Check In' (10:00 AM) and 'Check Out' (12:30 PM), each with a clock icon. Below these is a dropdown for 'EVV Method' set to 'Portal Signoff'. The 'Check Out Date' is set to '04/17/2024'. Under 'Add Reason Codes', there is a red asterisk and a button labeled 'Forgot mobile device'. The 'Add Reason Code Note' field contains 'No phone'. The 'Diagnosis Code' field is set to 'Diagnostic Code'. The 'Notes' field contains 'Add Notes for Punch'. Below the notes is an 'Attachment' section with a blue link 'Add Attachment'. At the bottom of the form, a red error message states: 'There is no active Authorization for this account. Please contact your supervisor.' At the very bottom are 'Cancel' and 'Save' buttons.

- The employee will receive this alert when attempting to punch for a date after the authorization/service plan has expired
- They cannot save the punch
- The employee should contact the employer
- The employer should verify their authorization data in DCI

Alerts

Punches must be **entered AND approved** within 30 days of the date of service. After 30 days the **Timely Filing Employees Punch Entry** or the **Timely Filing Employee Punch Approval** rules will prohibit the punch from being saved.

- The employee will receive this alert when attempting to punch for a date that is more than 30 days after the date of service
 - The Timely Filing Employee Punch Approval alert would show if the punch was created within the timeframe, but the employer was attempting to **APPROVE** the punch more than 30 days after the date of service.
- The employee cannot save the punch
 - Or, in the case of the Timely Filing Employee Punch Approval alert, the employer would be unable to approve the punch.
- No action can be taken

Alerts

Punches may only be entered for an active service account. If the employee attempts to enter a punch before the start date or after the end date of the service account, they cannot save the punch. This triggers either the **Employee Service Account Start Date Punch Entry** rule or the **Employee Service Account End Date Punch Entry** rule.

Alert

Your punch has one or more violations and cannot be saved. Please review the violations below and click Return to make edits or cancel the entry.

Business Rule Name

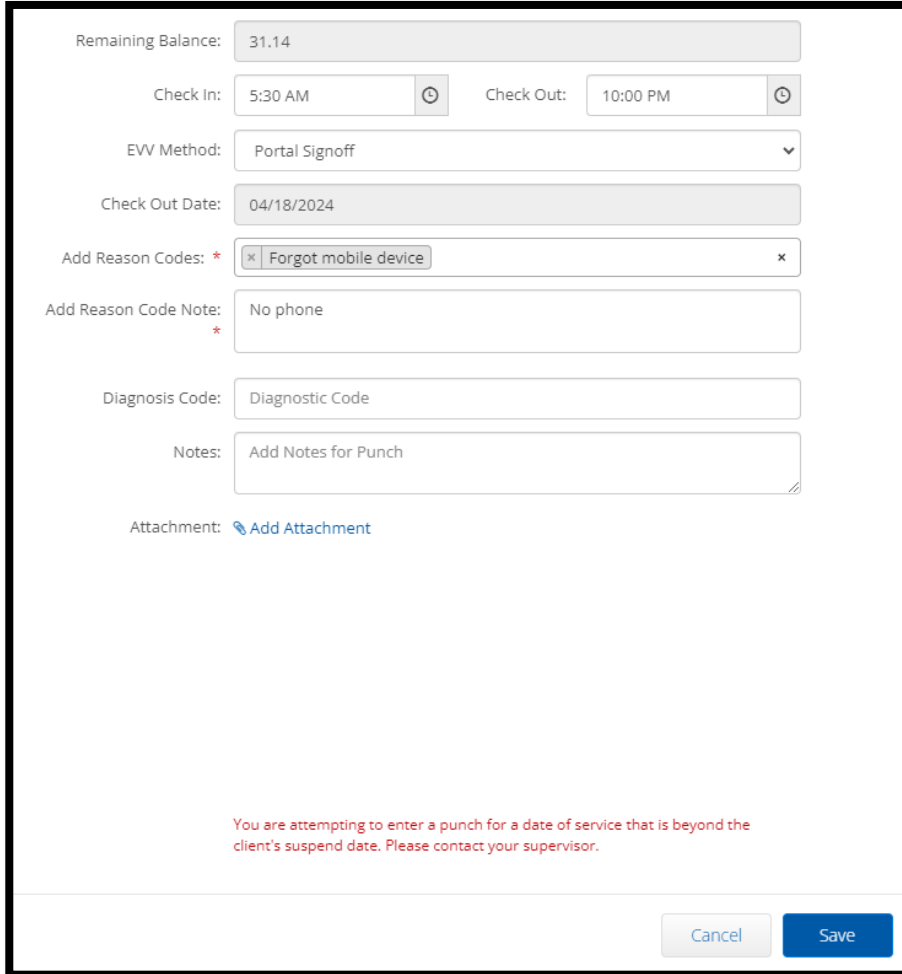

Employee service account start date punch entry

Return

- The employee cannot save the punch
- Ensure the correct dates have been entered for the punch
- The employee should contact the employer

Alerts

If enrollment is on hold, or the client cannot receive service, the client profile will be suspended. Punch entries cannot be added after the suspension date.

The screenshot shows a punch entry form with the following fields and values:

- Remaining Balance: 31.14
- Check In: 5:30 AM
- Check Out: 10:00 PM
- EW Method: Portal Signoff
- Check Out Date: 04/18/2024
- Add Reason Codes: * Forgot mobile device
- Add Reason Code Note: * No phone
- Diagnosis Code: Diagnostic Code
- Notes: Add Notes for Punch
- Attachment: [Add Attachment](#)

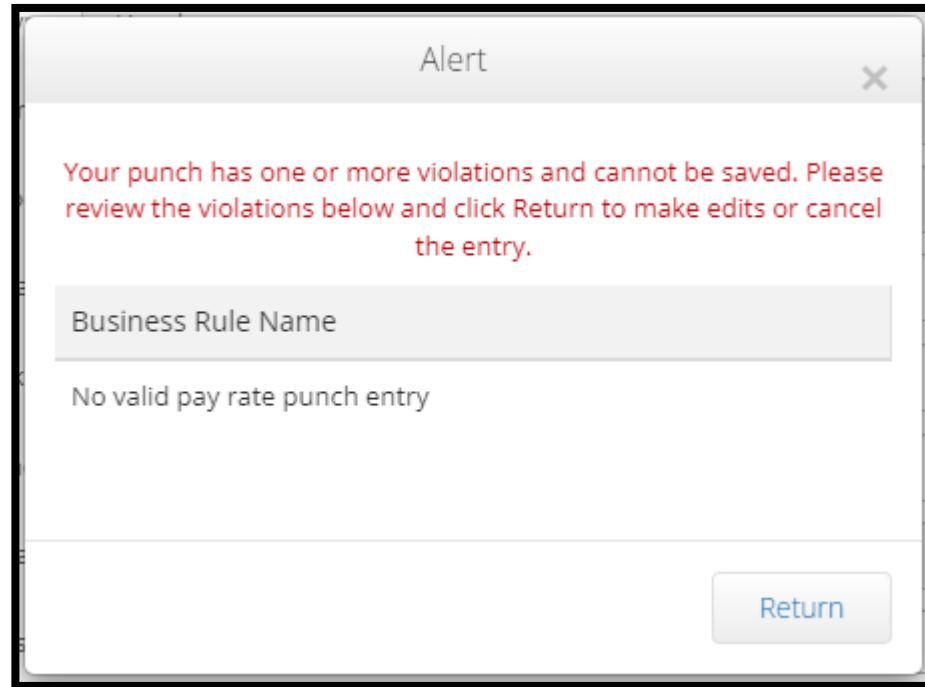

A red error message at the bottom of the form reads: "You are attempting to enter a punch for a date of service that is beyond the client's suspend date. Please contact your supervisor."

At the bottom right of the form are two buttons: "Cancel" and "Save".

- The employee cannot save the punch
 - While the system allows the employee to log in on the mobile app, they cannot clock out, so the punch is not saved.
- Ensure the correct dates have been entered for the punch
- The employee should contact the employer

Alerts

If enrollment was on hold, or the client couldn't receive service for a period of time, the employee would have no valid pay rate for that date range. The date of service the employee is attempting to enter a punch entry for has no valid pay rate.

- The employee cannot save the punch
 - While the system allows the employee to clock in on the mobile app, they cannot clock out, so the punch is not saved.
- Ensure the correct dates have been entered for the punch
- The employee should contact the employer

Alerts

If the punch causes the authorization remaining balance to drop below 75% of the initial balance, an alert displays at the time of approval. It does not stop the punch from being approved.
